Yu-Jing Qin

933 N Cherry Avenue – Tucson, AZ 85719
+1 (520) 333-8213 • qinyj@email.arizona.edu • qinyj-astro.github.io

Education

The University of Arizona — **Tucson, Arizona**
Ph.D., Astronomy, Department of Astronomy and Steward Observatory — *2022 (Expected)*

University of Chinese Academy of Sciences — **Shanghai, China**
M.Sc., Astrophysics, Shanghai Astronomical Observatory — *2016*

Nankai University — **Tianjin, China**
B.Sc., Physics, School of Physics — *2012*

Research Interests

- **Topics:** supernova, observational cosmology, stellar population synthesis, galactic dynamics
- **Methods:** statistics, forward modeling, machine learning

Publications

First-author papers

4 **Yu-Jing Qin**, Ann Zabludoff, Iair Arcavi, David Sand, Nathan Smith, Yakov Faerman, Dan Maoz, "*The Statistics and Environments of Hostless Supernovae*," submitted to AAS journals (2021)

3 **Yu-Jing Qin**, Ann Zabludoff, Marina Kisley, Yuantian Liu, Iair Arcavi, Kobus Barnard, Peter Behroozi, K. Decker French, Curtis McCully, Nirav Merchant, "*Linking Extragalactic Transients and their Host Galaxy Properties: Transient Sample, Multi-Wavelength Host Identification, and Database Construction*," ApJS accepted (2021) arXiv:2111.08016

2 **Yu-Jing Qin** & Juntai Shen, "*An Empirical Proxy for the Second Integral of Motion in Rotating Barred or Tri-axial Potentials*," ApJL, 913, 22 (2021) doi:10.3847/2041-8213/abfdb2

1 **Yujing Qin**, Juntai Shen, Zhao-Yu Li, Shude Mao, Martin C. Smith, R. Michael Rich, Andrea Kunder, Chao Liu, "*Kinematics of the X-shaped Milky Way Bulge: Expectations from a Self-consistent N-body Model*," ApJ, 808, 75 (2015) doi:10.1088/0004-637X/808/1/75

Co-authored papers

7 Marina Kisley, **Yu-Jing Qin**, Ann Zabludoff, Kobus Barnard, "*Classifying Astronomical Transients Using Only Host Galaxy Photometry*," submitted to AAS journals (2021)

6 Behzad Tahmasebzadeh, Ling Zhu, Juntai Shen, Ortwin Gerhard, **Yujing Qin**, "*Deprojection of external barred galaxies from photometry*," MNRAS accepted (2021) doi:10.1093/mnras/stab3002

5 Ann Zabludoff, Iair Arcavi, Stephanie La Massa, *et al.*, "*Distinguishing Tidal Disruption Events from Impostors*," Space Science Reviews, 217, 54 (2021) doi:10.1007/s11214-021-00829-4

4 Brenda L Frye, Massimo Pascale, **Yujing Qin** *et al.*, "*PLCK G165.7+67.0: Analysis of a Massive Lensing Cluster in a Hubble Space Telescope Census of Submillimeter Giant Arcs Selected Using Planck/Herschel* ," ApJ, 871, 51 (2019) doi:10.3847/1538-4357/aaeff7

3 S. Rabien, R. Angel, L. Barl, U. Beckmann *et al.*, "*ARGOS at the LBT. Binocular laser guided ground-layer adaptive optics*," A&A, 621, 4 (2019) doi:10.1051/0004-6361/201833716

2 Chao Liu, You-Gang Wang, Juntai Shen, Zhao-Yu Li, **Yu-Jing Qin**, Yonghui Hou, Yuefei Wang, Yong Zhang, Zihuang Cao, Yue Wu, "*The Local Spiral Arm in the LAMOST-Gaia Common Stars?*," ApJL, 835, 18 (2017) doi:10.3847/2041-8213/835/1/L18

1 Alice C. Quillen, Ivan Minchev, Sanjib Sharma, **Yu-Jing Qin**, Paola Di Matteo, "*A vertical resonance heating model for X- or peanut-shaped galactic bulges*," MNRAS, 437, 1284 (2014) doi:10.1093/mnras/stt1972

Talks & Presentations

- Harvard CfA Seminar (remote) — Oct 2021
- KIAA-DoA Seminar, Peking University (remote) — May 2021
- Steward Observatory Early Career Scientist Talk — April 2021
- Steward Observatory Journal Club — November 2019
- Arizona – Los Alamos Days, Tucson, AZ — April 2019
- Steward Internal Symposium — September 2018
- Aaronson Symposium, Tucson, AZ (*Poster*) — April 2017
- Steward Internal Symposium — September 2016
- Steward Observatory Journal Club — September 2016

Teaching & Tutoring

- Teaching Assistant, Cosmology (201) — Spring 2021, Fall 2017
- Teaching Assistant, Theoretical Astrophysics (400A) — Fall 2021, Fall 2020, Fall 2019
- Tutor, Astronomy Tutoring for Majors and Minors (ATOMM) — 2019 – 2021

Service

- Volunteer, Steward Observatory Science Coffee — Summer – Fall 2019
- Volunteer, Steward Observatory Galaxy Seminar — Fall 2021

Data & Software Contributions

- Transient Host Exchange, public database of transient host galaxies: doi:10.5281/zenodo.5568961
- Tempo-primo, correction of local velocity field: Github:Tempo-primo
- *orbita*, orbital integration in galactic potentials: Github:orbita
